Seedling and Price Lists  
1948

R.F.D., ROSLYN, L.I., NEW YORK

..... Since its first discovery by man,  
the ORCHID has been considered one of the most exotic  
flowers in Nature's Wonderland - a true aristocrat of  
the floral kingdom. However, in the years of its "civ-  
ilized existence," so to speak, the orchid has travel-  
ed a long way, not alone from its natural habitat, but  
also in cultural development. In the hands of profes-  
sional hybridists, both here and abroad, it has risen  
to new heights of perfection. Flowers have been bred  
for better form, color, size, texture, and lasting  
qualities; all of this has been successfully accom-  
plished by the careful selection and re-selection of  
every stud plant used in the production of a new  
hybrid by controlled pollination. Through many years  
of experience, the hybridizer has learned some of the  
answers to the problem of proper combinations which  
will give him the desired results and he continues to  
apply and expand this knowledge to improve each suc-  
ceeding generation of the lovely ORCHID.....

..... RALPH R. KIESEWETTER'S 37 years of  
experience, as an Orchid Hybridist, go into the mak-  
ing of every seedling produced at Orchid Gardens and  
through these years he has expended every effort to  
guard and maintain his policy of QUALITY PRODUCTION.

The very best stud plants available are used in each  
of these crosses and every one is guaranteed to be as  
represented.

Wasted years of culture and anticipation, which end  
only in disappointment, can be avoided by the initial  
selection of reliable seedlings, which have been de-  
veloped in the hands of an experienced Hybridist.

## GENERAL INFORMATION AND SHIPPING INSTRUCTIONS

Kindly give careful attention to the following suggestions, since they will expedite the handling of your order and insure its safe delivery:-

When placing an order, please mention a second choice if you have one: NO SUBSTITUTIONS WILL BE MADE IN YOUR ORDER without specific instructions from you.

Print or type your name and address clearly.

Cash, Check, or Money Order should accompany all orders unless previous arrangements have been made to open a credit account.

Please include definite shipping instructions with all orders. The safe shipping season begins about May 15th and continues through October. Safe shipment can be made, however, at any time via Air Express, providing arrangements can be made to pick up the package at its point of destination. Great care must be taken to avoid chilling orchid plants since they may never overcome the set-back suffered thereby. Quicker delivery has made this method of transportation most satisfactory, though the rates are slightly higher.

Orders may be placed to reserve your selections, at any time, but shipment will be withheld until favorable weather conditions assure safe delivery.

All shipments are made F.O.B. Roslyn, L.I., New York in U.S. Dollars. There is no additional charge for packing.

PRICES ARE SUBJECT TO CHANGE and ALL ITEMS LISTED ARE SUBJECT TO SALE. RRK.....

## SPECIAL NOTATION FOR YOUR INFORMATION

Tubes will be shipped only when the seedlings are ready to be transplanted into community pots, for regardless of packing or the method of shipping, the seedlings will arrive somewhat stirred up in the agar. It is advisable, therefore, to prepare your community pots ahead of time and transfer the seedlings as soon as possible after they arrive. This procedure will reduce your possible losses to a minimum.

All seedlings in community pots will be shipped in paper pots for protection at a time when they are ready to be moved to individual pots ( $1\frac{1}{2}$ " ).

Larger plants will be carefully wrapped and shipped out of pots to avoid any damage to leaves or tender growths, by pieces of pot broken in transit. Upon its arrival, simply drop the plant into the same size pot and secure it with a potting stick, using an additional wedge of osmunda fibre, if necessary. ....
